1. Fuel consumption and emissions as per ADR 81/02 (combined cycle) and to be used for vehicle comparison purposes only. It is unlikely that these fuel consumption and emissions figures will be achieved in real world driving conditions. Actual fuel consumption and emissions will depend on many factors including the driver's habits, prevailing conditions and the vehicle's equipment, condition and use. 2. On variants where both a 6-speed manual and 6-speed auto are available, the 6-speed auto typically is 17-18kg heavier than manual, which then reduces the payload by 17-18kg. 3. Kerb Weight includes the vehicle with a full tank of fuel, without occupants, luggage or cargo and with all standard equipment. Additional weight of optional features must be taken into account when calculating kerb weight. Vehicle dimensions/weights are approximate and subject to individual variances. Vehicles should be weighed before adding additional load, accessories or towing a trailer to ensure the maximum Gross Vehicle Mass (GVM) and Gross Combined Mass (GCM) are not exceeded. 4. Subject to State and Territory regulations. Payload is defined as the Gross Vehicle Mass minus the kerb mass. Payload is the maximum combined value of occupants, cargo, added options, added structures and tow ball download (when towing). GVM must not be exceeded. 5. Maximum braked towing capacity when fitted with a genuine Ford Tow Pack. Subject to State and Territory regulations. Further weight restrictions apply, please consult your authorised Ford Dealer and/or refer to the Owner's Manual for guidance.

Subject to State and Territory regulations. Payload is defined as the Gross Vehicle Mass minus the kerb mass. Payload is the maximum combined value of occupants, cargo, added options, added structures and tow ball download (when towing). GVM must not be exceeded. 5. Maximum braked towing capacity when fitted with a genuine Ford Tow Pack. Subject to State and Territory regulations. Further weight restrictions apply, please consult your authorised Ford Dealer and/or refer to the Owner's Manual for guidance.

1. Fuel consumption and emissions as per ADR 81/02 (combined cycle) and to be used for vehicle comparison purposes only. It is unlikely that these fuel consumption and emissions figures will be achieved in real world driving conditions. Actual fuel consumption and emissions will depend on many factors including the driver's habits, prevailing conditions and the vehicle's equipment, condition and use. 2. On variants where both a 6-speed manual and 6-speed auto are available, the 6-speed auto typically is 17-18kg heavier than manual, which then reduces the payload by 17-18kg. 3. Kerb Weight includes the vehicle with a full tank of fuel, without occupants, luggage or cargo and with all standard equipment. Additional weight of optional features must be taken into account when calculating kerb weight. Vehicle dimensions/weights are approximate and subject to individual variances. Vehicles should be weighed before adding additional load, accessories or towing a trailer to ensure the maximum Gross Vehicle Mass (GVM) and Gross Combined Mass (GCM) are not exceeded. 4.
